FIRELEX

Productivity tools developed by lawyers for lawyers
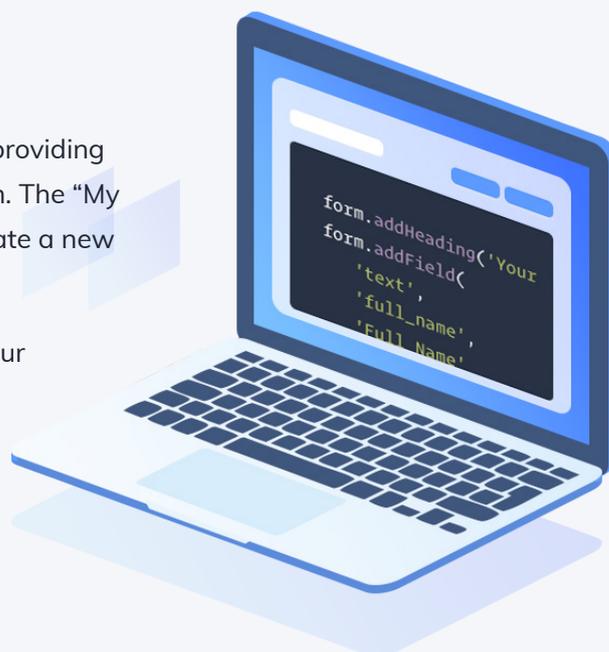

No installation. No maintenance. No hassle.

FIRELEX represents a new approach to document automation:

- Get access to our library of pre-made templates

- Code up new templates using a simplified version of NodeJS/JavaScript and learn a 21st century skill

- Eliminate vendor risk by exporting all templates into a standalone open-source application

Coding for lawyers

FIRELEX comes with comprehensive online documentation providing lawyers with an easy introduction to docuement automation. The "My first application" tutorial, which teaches lawyers how to create a new template, takes 20 minutes to complete.

How it works

Legacy document automation solutions often suffer from clunky user interfaces and limited functionality.
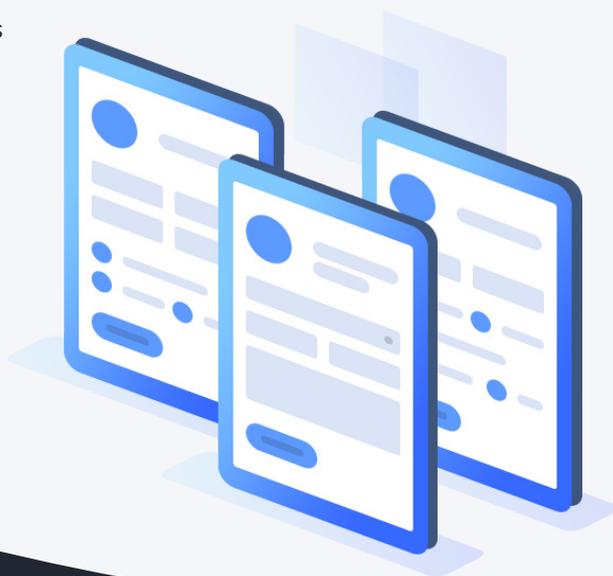

It doesn't have to be that way. Modern web technologies have evolved to the point where it has become very easy for anyone, including lawyers, to solve many of the challenges they encounter in their day-to-day lives with a few lines of code.

Need to set up a nice-looking web page that guides users through a questionnaire? How about automating that legal opinion you need dozens of time a year and that is always a hassle to draft?

FIRELEX empowers lawyers to take their fate into their own hands. Watch our getting started video on www.firelex.com to see yourself how easy it is.
